In April 2000, the Harvard School of Public Health and the Global Health Council organized a small workshop to examine questions about public-private partnerships in international public health. This book presents the results of the workshop. The essays in this volume offer some fresh perspectives on partnerships, probe some troubling questions, and provide empirical evidence of both benefits and challenges of public-private partnerships.

Prepared by the Johns Hopkins Bloomberg School of Public Health, Institute for Health, and Productivity Studies, and the de Beaumont Foundation, this report presents seven practical steps that businesses can take to strengthen partnerships and improve the health of their employees, communities, and the nation. These recommendations were informed by a series of focus groups and personal interviews with 40 business and public health leaders who shared ideas about what can be done to address the immediate COVID-19 crisis and its spillover effects on the health and well-being of Americans.
